

Geography		
Key word	Definition	Visual
Erosion	When wind or water wears away the land.	 A diagram showing a cross-section of a brown rock surface. Three blue water droplets are falling from the top. Three blue arrows point downwards from the droplets, indicating the direction of water flow. Small brown rocks are shown being carried away from the surface.
Glacier	A large, slow-moving sheet of ice that can shape the land.	 A simple line drawing of a glacier. It shows a large, white, rounded mass of ice with a jagged front edge. Two small evergreen trees are on either side of the glacier.
Glacial landforms	Any land feature shaped by the action of glaciers.	 A photograph of a large glacier flowing through a mountain range. The glacier is a mix of white and blue ice, with dark rocks visible within it. The surrounding mountains are covered in snow.
Advancing glaciers	A glacier that is growing in size.	 A photograph of a glacier's leading edge. The ice is a deep blue color and is breaking apart into smaller chunks. A small stream of water is visible at the base of the ice.
Retreating glaciers	The process where glaciers lose more snow and ice through melting, leading to a reduction in their size and mass.	 A photograph of a glacier melting. Large chunks of blue ice are falling into a body of water, creating a large splash and white foam.
Deposition	When ice or water drops off the rocks and materials it has been carrying.	 A diagram showing a cross-section of a body of water. A black arrow points downwards from the water surface to a small brown boat. The boat is carrying several small brown rocks.

History		
Key word	Definition	Visual
Historical Figure	An individual who has played a significant role in history, influencing events, shaping ideas, or making notable contributions to society, culture, politics, or other areas.	
Historical Site	A place or location that has significant historical, cultural, or archaeological importance due to its association with past events, people, or traditions.
